A POSTCARD FROM THE FUTURE

Kerikeri, 2050

Kia ora,

It's been years since I visited Kerikeri and it sure has changed. I've been told the people of the Far North had a chance to develop a shared vision for the District in 2015. Community leaders asked them what they wanted the Far North to look like in 2050, so they could draw up an action plan and get everyone working towards common goals. It was a bold project that was about finding out what people valued and what sort of environment, quality of life and opportunities they wanted to leave for their children and grandchildren. They even set up a website called www.telluswhatyouwant.co.nz where people could have their say and go into a draw to win prizes. Have you checked out the website or done the 10-minute survey? If not, go to www.telluswhatyouwant.co.nz now and shape your future! What do you want Kerikeri to look like in 2050? What do you think of this postcard? Wish you were here?
